

July 11, 2007

President Jones was enroute to Birmingham to visit with John and Sara Kerr when he received a cell phone call from Dr. Kerr himself. He is much improved over yesterday. He has been fever free for 24 hours and even walked a short distance with the aid of a walker. He is showing his usual resilience in combating his injuries. The doctors plan to keep him on antibiotics for 6 weeks to forestall any further infections. He is very appreciative of the prayers on their behalf.
